Text of the Address.

The text of the address of the President is as follows:
"Members of the Associated

Press: During the closing days of the last Congress I sent to the Senate a communication asking its advice and consent to the adhe ence by the Government of the United States to the protocol establishing the International Courof Justice. Out of this simple hatural, normal proceeding has developed so much of mystery, so much of misunderstanding. much of protest and approval, se much of threatened muddying of the political waters, that I welpropriate an occasion, to reveal to pose and the motives impelling.

Ours is popular governmen through the agency of political parties, and it must be assumed that the course of the successful party, which is at the same time an honest party, must be fair-ly chartered by the platform of that party, and by the utterances of its candidates when appealing for popular approval. On that assumption it is seemly to recall the declaration of the party now in power relative to the promotion of international relationships.

"In 1904 the national platform of the Republican party said, "We favor the peaceful settlement of international differences by arbinational convention of 1908, the

In 1912 the Republican platform made a very explicit declaration relating to an international

court of justice. the party covenant of faith: Together with peaceful and orderly development at home, the Republican party earnestly favors all measures for the establishment and protection of the peace of the world, and for the development of closer relations between the various nations of the earth. It believes most earnestly in a peaceful settlement of international disputes and in the reference of all controversies between nations to an international court

"The next formal and solemn pledge was made in 1916. I quote

The Republican party be lieves that a firm, consistent, and courageous foreign policy, always maintained by Republican Presidenta in accordance with American traditions, is the best, as it is the only true, way to preserve peace and restore to us our rightful place among nations. We be lieve in the peaceful settlement of international disputes and favor the establishment of a world court for that purpose." "In 1920 the question of our

foreign relationship was very acute. The Senate had rejected the Versailles Treaty and the League of Nations pact. The vention voiced its approval of the rejection, but was unwilling to pledge aloofness from the world. Therefore it said in its platform pronouncement:

'We pledge the coming Republican administration to such agreements with other nations the world as shall meet the full duty of America to civilization and humanity, in accordance with American ideals, without surren-dering the right of the American people to exercise its judgment and its power in favor of justice and

al system has one very serious flaw, in the opinion of Rabbi Leon Harrison of Temple Israel, noted scholar and publicist. This is that only about 10 per cent of the boys and are in any way prepared for the economic battle of life. This statement was made in the course of an address commemorative of the birthday of Thomas Jefferson, which Dr. Harrison delivered frem Radio Station K S D of the Post-

A large proportion of the chil-dren in the public schools of this country, he said, never get beyond the eighth grade, and it happens that in only a few instances do the secondary schools have courses in any subject that will give the boys and girls a trade with which to start their career as wage earners. He cited what he called a shining exception to this rule in the public schools of Gary, Ind., from which all the graduates emerge equipped with at least one, and in many cases several, trades. The instruction in these trades, he said, is so practical and comprehensive that he labor unions credit the school work as apprenticeship and take the graduates immediately into the

Dr. Harrison's subject was "The Gospel of Labor," and in his talk the speaker said that the nation which Thomas Jefferson had helped to found still is holding up to the world the principles of true democracy, and has become an example which the entire world is fol-

A program of music preceded the address, given in an artistic manner by vocalists of this city and East St. Louis, and two planists. Operatio arias and ballads had place in this program, the singers being Mrs. Frank Sacks, coloratura soprano, of St. Louis; Mrs. M. E. Ruston, dramatic soprano, of East St. Louis, and Clarence Moore, tenor, of East St. Louis. Mrs. Henry Cohen and Mrs. Charles M. Skaggs were the planists, and they were assisted by Miss A. Lulu Hill, reader, who gave an entertaining presentation of a homely little story about a country woman's first experience with an elevator in a tall building.

Tonight's program will be by the Majestic Quartet, vocalists, and the Floreine Mandelin Orchestra. A short dance program by the South Side Jazz Band will precede this, and Side Jarz Band will proceed this, and there will be two addresses, the speakers being Major-General George Van Horn Moseley, com-mander of the Sixth Army Corps, and Dn Edgar Anderson of the Missouri Botanical Gardens

A Laxative Food that is delicious

YOU never knew before how truly delicious a breakfast of real bran food can be. Post's Bran Flakes with Other Parts of Wheat is altogether new and not a bit like the ordinary bran you may have persuaded yourself to eat in the past.

These new flakes are made by a special process, which retains with the bran other valuable parts of the wheat berry, and are crisp-cooked and appetizing. They contain the nourishing qualities of the wheat, its carbohydrates, proteins and mineral elements, plus "Nature's way" of wheat bran to induce regular habits. Post's Bran Flakes are non-irritating to any part of the digestive tract.

Happily the special process preserves practically the full vitamin content of the wheat.

The Postum Cereal Company studied and experimented for four years to find how to give you this most valuable hygienic factor, bran, in the most palatable and health promoting form.

Post's Bran Flakes is the result of those years of careful study by the Company whose name is synonomous with pure food the world over.

No chokey feeling when you swallow these delicate flakes. You don't have to try to swallow them, either, the way you do ordinary bran products.

Try them with cream or milk as your breakfast cereal tomorrow, and regularly for some days-then note the welcome difference in your regularity.

A generous package for 15 cents

COLID COPPER TUBS are found on Better Clothes Washers. Copper is easier to clean and refuses lodgement for germs. Also, as shown by cooking utensils and wash boilers, as far back as seen in history, copper has the most lasting quality.

is a better clothes washer

Coffield's tub is of solid copper of the highest grade, heavily tinned inside; has astonishing washing capacity; is "double seamed", strongly reinforced and suspended so that the weight of rushing suds is always evenly distributed. Has patented drain on end of tub where it swings entirely within the frame and cannot strike anything. Has large opening and lid is self-fastening and splash-proof. No working parts in tub-nothing to tear and tangle garments. The Coffield Tub is unexcelled.

Jay Gould's estate. Other Demands in Suit. In addition to asking the court to eprive Frank Jay Gould of one-half his inheritance, George Gould also demanded that Frank should make an adjustment of alleged overcharges and overpayments in Frank Gould's favor when Frank Gould acted as co-trustee of the estate.

Frank Gould's first marriage is not attacked in the paper. George Gould, Mrs. Shepard, Howard Gould and the Duchess de Talleyrand, his brothers and sisters, all approved his marriage in 1901, when Miss Helen Margaret Kelly became the first Mrs.

Frank Jay Gould. The Jay Gould estate was valued at \$80,000,000 when Jay Gould died in 1892. Allegations were recently made that, under George Gould's trusteeship, the estate dwindled to \$60,000,000. Each of the six children received an equal share under the terms of Jay Gould's will.

Amount Involved in Case. Should the estate be found to be worth only \$60,000,000 by the court, Frank Gould would have to turn \$5,-00,000 over to his five brothers and sisters, together with one-half of all the income he has received from his share since his marriage with Edith Kelly in 1910, if George Gould's conntion is upheld by the Supreme

Melto Melts Your Fat Like Magic

In the mountains, in the country, at the seashore—wherever you go this summer you can be proud of your slender appearance! You can have a slim graceful figure, that will show to excellent advantage your newest summer clothes! You can be as slim as you'd like to be—if you will spend a few minutes each day with Melto Reducing Cream.

Melto is applied externally.

You simply apply it to the places you want to reduce. It is as efficient on the hips, as on the breast, chin, arms, legs, ankles or elsewhere.

All fat is under the skin. Melto-works its way through the pores and quickly melts away your excess fat! It leaves the skin firm, and velvety soft. It does not interfere with your mode of living.

Thousands of grateful women have told us what wonders Melto has ac-complished for them.

Make this the happiest summer of your life. Begin the use of Melto now. All it takes is five minutes a day, all it costs is \$8 for an eight ounce jar and all you need do to get it is say Melto at your druggist or favorite toilet goods counter. Get Melto today.

It's absolutely harmless!

It is now known that body odorsespecially odors not usually detected, except by others—are caused primarily, not by perspiration, but by excess secretions of the sebaceous glands under the arms. These secretions take place constantly during any emotional or nervous activity-at the theater or dance; when playing cards or reading a novel; when engaged in outdoor sports; also

during moments of fear or excitement. Don't interfere with your normal sweat activity by trying to smother body odors with makeshifts. Use a genuine deodorant that banishes body odors surely and harmlessly.

Immac is the only medicinal preparation scientifically compounded to prevent clogged sebaceous glands, cleanse the under-arm pores, and completely nullify the stagnant odors which settle in the armpits as a result of nervous or emotional activity.

Just try one Can of MAZOLA and See whether You Still Prefer the of Cooking. Old-fashioned Methods

INTELLIGENT American women who demand the best for their table find Mazola gives a satisfaction obtained from no animal fat or ordinary cooking oil.

This they have proved over and over again, under every possible condition.

That's why more than seven million discerning housewives throughout the country use Mazola exclusively for all cooking and salad purposes.

For frying, sauteing and all cooking purposes you use much less Mazola than of lard, cooking compounds and butter.

Because Mazola can be heated to a higher degree without smoking, you don't have smoky rooms or the odors of burning fat around the house.

This high heating cooks the

food quickly on the outside and prevents the oil from soaking into the food - making all your fried foods easily digestible.

Mazola absorbs no odors or flavors of the foods fried in it. You can strain Mazola and use it over and over again.

WE extend to you the privilege of using a can of Mazola. If you are not perfectly satisfied that Mazola is better and more economical, your grocer will refund your money.

Mazola is sold in pint, quart, half-gallon and gallon tins, packed and sealed under expert supervision. It is never sold in bottles or in bulk.

Saving the Lives of a Nation More than five hundred thousand (500,000) lives

are saved annually in this country through the medium of disease prevention—lives that would have been lost a very few years ago. The importance of this saving cannot be estimated.

Many causes have helped to save these lives and improve the health of the people of this country. Notably among these are the scientific discoveries and the methods of medical practice in the prevention of disease.

The old adage, "A stitch in time saves nine," applies with full force to the human system. Prevention of disease is most important, and present-day physicians strive to prevent disease rather than allow it to gain a hold on their patients and then undertake the uncertain task of attempting a cure.

As a preventive of diseases that originate through imperfect functioning of the organs of assimilation and elimination, among other items, physicians recommend judicious care in the selection of drinking water.

More St. Louis physicians recommend and prescribe Mountain Valley Water from Hot Springs, Ark., than any other mineral water known.

Mountain Valley Water is recommended and prescribed by physicians in cases of Bright's Disease, Diabetes, Rheumatism, High Blood Pressure, Stomach, Liver, Kidney and Bladder Diseases.

There Is No Substitute for Safety

SAFETY is the one indispensable quality in an investment. In selecting securities you should make sure of the safety of your funds before you even consider any other factors.

Straus Bonds are safe-because of the care and vigilance with which they are selected and purchased, and the rigid system of safeguards, known as the Straus Plan, which surround them. The best indication of their safety is our record-41 years without loss to any investor -and their unvarying prompt payment of both principal and interest.

Write for our booklet, "Forty-One Years Without Loss To Any Investor", which tells about the Straus Plan in detail, and for carefully selected offerings of sound Straus first mortgage bonds. Call at one of our offices or write today and ask for

Information in regard to this issue and the new company is given in a letter from Mr. J. W. Daniels, President of the Archer-Daniels Linseed Company, who will be President of the new company, copies of which may be obtained from the undersigned, and which he has summarized as follows:

Business and The Archer-Daniels Linseed Company and the Midland Linseed Products Company started in business more than twenty years ago and have both grown steadily. The new company will take over the business and properties of the Archer-Daniels Linseed Company and will own all of the stock of The Toledo Seed and Oil Company and of the Deliwood Elevator Company, Inc. except directors' qualifying shares. It will at the same time become the owner of all of the plants of the Midland Linseed Products Company, which company, however, will retain the operation of those plants for its own account until July 1st in order to liquidate its commitments. The new company will then have the largest capacity for linseed crushing in the world and will operate as a unit the adjacent mills of the Archer-Daniels Linseed Company and the Midland Linseed Products Company at Minneapolis, Toledo and Edgewater, New Jersey, as well as the plants at Chicago and Buffalo. Substantial economies are expected to follow the consolidation.

The new company will be managed by those who have been primarily responsible for the past success of the Archer-Daniels Linseed Company

The net sales and net profits of the Archer-Daniels Linseed Company, The Toledo Seed Sales and and Oil Company, the Dellwood Elevator Company, Inc. and the Midland Linseed Products Profits Company, before deducting Federal income and profits taxes paid but after giving effect to Federal taxes at the present rates, for the six years and six months ending March 31, 1923, as certified by Messrs. Price, Waterhouse & Co., Public Accountants, were as follows:

1917..... \$31,775,938.8 \$1,437,568.14 1918 731,262.31 42,571,579.49 1.938,053.78 58,580,758.96 2,817,313.80 101,550.66 36,068,761,52 30,513,016.17 1.043,954.01

The average of these earnings for the last six years is in excess of three and three-quarters times the annual dividend requirement upon the issue of Preferred Stock, and the earnings for the last six months are at the rate of more than five and one-half times such dividend requirement.

Business for the past six months has been active and profitable as shown by earnings. Conditions surrounding the industry are most satisfactory. Demand for the products is very strong. Plants are booked to capacity for as far ahead as the company is willing to sell and a prosperous year seems assured.

Assets: The Balance Sheet of the new company as of March 31, 1923, certified by Messrs. Price, Waterhouse & Co., Public Accountants, after giving effect to the issue of its capital stock, shows tangible assets of \$14,955.998.44 of which \$7,407,054.66 are current assets, against current liabilities of \$3,407,054.66. What we don't know about sleep and what we do know

Science does not know what sleep is, nor the nature of the causes which produce it. But that the need of sleep is regular and imperative, is established beyond question.

Loss of memory, diminished energy, and lessened mental power all follow in the wake of poor sleep. Isn't it tremendously worth while, then, to make certain that your sleep is not second best but first-rate?

Take ten minutes tonight to study the mattress and spring you sleep on. Then go to your furniture dealer's and examine the wide range of Simmons springs and mattresses at prices fitting any pocketbook. Compare them. Important Information for Every User of Gas

HE best, the cleanest and the most convenient fuel known to man - gas - is piped in yourhome. Since 1815, the use of gas in the American home has steadily increased until every modern structure is equipped

with this ever-ready, always-willing, labor-saving servant.

One of the greatest achievements of gas is this:—

It combines with your running cold water supply and the Ruud Automatic Water Heater to give to every home Ruud Perfect Hot-Water Service-in instantly ready, inexhaustible and inexpensive hot-water supply.

In a word, this-you don't have to live in a fine hotel or apartment to have Perfect Hot-Water Service.

The Ruud gives you the same service, and because it operates automatically, it limits the expense so that you pay for the hot water actually used-and no more.

How much do you pay for three cigarettes—an egg—a half of a cigar?

The daily hot-water needs of each person in your home will cost no more than any one of these items for which you cheerfully and continuously pay.

The Ruud will perform a vital service in your home. Compared with the cost of other services, less important, its monthly expense is small. Let us prove it. Ruud Automatic Hot Water actually costs less than

water heated by coal. Let us prove it. If you have a furnace coil, don't think for a second that you are getting your hot water for nothing. One shovel of coal in every five goes directly to heat your water supply. Let us prove it.

The Ruud is the greatest labor-saving appliance you can put in your home. Let us prove it.

A Free Demonstration

See the Ruud work at our main or branch offices. If not convenient, phone us to have one of our water heater specialists call. No obligation.

America's Change of Thought on Watches

THE buying power of America makes I it a coveted market for watches.

This country has had a chance to try nearly all the different grades of watches in the world-both foreign and domestic.

Watches are bought so infrequently that it took a long time for watchusers to become watch wise as a nation.

But today human experience is breaking through.

People are finding out that what they chose a watch for in the past wasn't what they really wanted at all.

They are finding out that nothing is more extravagant than the cheap watch.

Nor, on the other hand, nothing more impractical than the watch which sells on an outward jewelry value instead of timekeeping good faith.

Today's insistence on better timekeepers turns naturally to the professional time-piece.

The professional Elgin with its almost unbelieveable good will.

With its place of affection and recognition, wherever you find Americans who refuse to carry anything but a watch of timekeeping responsibility.

There is a shortage of Elgin Watches.

There has been for the past two years. Wherever you find an Elgin that suits your idea of beauty and price, by all means take it at once.

Here is a group of them pouring out their smoke in a California citrus orchard on a recent cool spring night. They burn oil or tar and the resulting hot smoke is what keeps the frost away. They are said to be effective only in small orchards.

There's a right and a wrong way to clean enamel and porcelain. Old Dutch is the ideal cleanser for them because its fine, flaky particles not only take off dirt, but preserve the fine, smooth surface.

A little Old Dutch goes a long way

Old Dutch is economical because a little of this natural cleanser gets rid of a lot of dirt and you don't have to use so much cleaning material.

It does its work quicker, too, because you don't have to go over the same surface again and again. Old Dutch erases the dirt the first time.

The reason is that Old Dutch is composed of a fine flaky material whose particles lie flat and cover more surface. It picks up all the dirt and leaves a clean sweep behind it. Naturally it does every cleaning fob more, thoroughly, and leaves the surface sweet and clean.

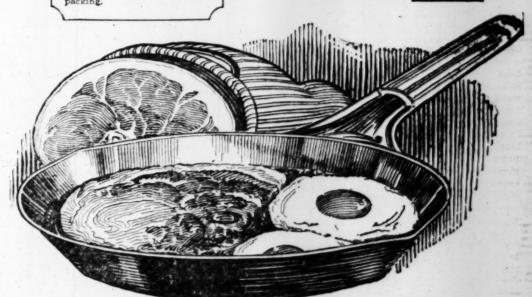

Old Dutch, removes the dirt -not the surface

By IRVIN S. COBB. A STICKLER FOR THE DETAILS.

I have one more grand jury story to add to this symposium and then I think I shall be through with grand juries, for a time, at least. This particular yarn I had from a District Attorney of a neighboring state, who was present when the thing happened and who, to me, vouched for its authenticity

The grand jury of his county was in session investigating such c inal cases as had accumulated since the previous term. The clerk read a complaint and a sergeant-at-arms brought in a badly battered Pole as the chief complaining witness against a fellow-countryman.

Through an interpreter, the witness told a remarkable story. In effect, he said this: That he and the defendant had been friends for years in this countryy and before that in Poland; that they met frequently and that about a year before the defendant, who was married, confided to the sitness, who was single, that he hated his wife and that some day he was going to invite her to go boating with him and when he got her out In the middle of the river meant to knock her in the head with an oar and throw her overboard. The witness stated that, personally, he had not looked with favor upon this plan and at the earliest opportunity had tent a private messenger to his friend's wife advising her not to go on any skiff-riding trips with her husband.

In view of subsequent developments he now was constrained to befleve that the husband somehow had learned of this betrayal of confidence. Through the interpreter, the Pole in the witness continued his story somewhat after the following fashion

"Six weeks ago, when spring had come, this man came to me and suggested that we go fishing. We went up the river several miles. After we'd been fishing a little while he pulled out a bottle and invited me to have a few drinks. I only took four or five drinks, but somehow it made me sleepy. So we landed and I laid down on the grass. Pretty soon I was waked up by being hammered over the head with a club. Before lost my senses I realized that he'd pulled my overcoat up over my head and tied it Then he tied my hands and feet with a piece of rope, hit m a few times more on the head and threw me in the water. But some fellows on the upper floor of a carpet factory on the bank saw me in the river and hauled me out and took me to the hopsital where I've been eve

His evidence having been completed the foreman excused the ban-daged victim, but before he could quit the chair one of the grand jurors who had been listening with the utmost inferest to the startling story, halted him and informed the interpreter that, in the interest of justice

to all, he desired to put one question.

"What do you wish me to ask him?" inquired the interpreter.

"You ask this man whether, when he went fishing with the defendant, tid be have a license to fish?"
